#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
2. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mansdorfer et al (EPO 0780244; cited by Applicants).

The rim of Mansdorfer et al includes a mounting groove 13 and a connecting zone 14. As shown in figure 1, the thickness of the mounting groove is greater than the thickness of the connecting zone. The structure of the rim satisfies the equations of the claims, with the exception of the measurements or dimensions of the thicknesses. However, the exact measurements or thicknesses of the various portions of the rim as considered to be obvious mechanical expedients and therefore would have been obvious to those of ordinary skill in the art based on the overall size of the wheel and rim, the intended use, the load the wheel is expected to carry in use, and other factors which are well-known.

With respect to claim 17, the method by which the rim is formed is given no patentable weight in the product claim.

***Information Disclosure Statement***

3. It is noted that Applicants have not provided translations of the non-English references cited on the IDS.
4. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show other wheels and rims in which certain portions are thicker in order to strengthen those areas of the wheel or rim.
